Finding books in the Library

- Your goal is to match up the call # you have in hand to the label on the book that you need.
- The book rows have signs on them indicating what call #s can be found down each aisle.
- First find the aisle you need to go down by locating the letter portion of the call # and the whole number.
- Walk down the aisle and browse book call #s until you see that letter number combination for your book, then use the rest of the call # to pinpoint the book’s exact place on the shelf.
